

7th International Fermi Symposium

Wednesday, 18 October 2017

Analysis techniques: Methods (11:00 - 12:30)

-Conveners: J. Michael Burgess

time	[id] title	presenter
11:00	[127] Information field theory for gamma ray astronomy	ENSSLIN, Torsten
11:30	[170] Searches for Angular Extension in High-Latitude Fermi-LAT Sources	CAPUTO, Regina
11:45	[150] A new way of searching for transients: the ADWO method and its results	BAGOLY, Zsolt
12:00	[70] Time Domain Astronomy with Fermi GBM in the Multi-messenger Era	WILSON-HODGE, Colleen
12:15	[227] An Overview of the GBM Targeted Search For Sub-threshold Emission Associated with LIGO/Virgo Detections	KOCEVSKI, Daniel
