

7th International Fermi Symposium

Tuesday, 17 October 2017

Stellar sources (galactic and extragalactic) II - GaPa/1-1 - Olympiasaal (14:00 - 15:45)

-Conveners: Andrzej Zdziarski

time	[id] title	presenter
14:00	[101] The Gamma-ray Binary in the LMC: Implications for Populations and Further Discoveries	CORBET, Robin
14:30	[93] The Monster Next Door: Fermi-LAT observations of Supernova Remnant N132D in the Large Magellanic Cloud	CASTRO, Daniel
14:45	[134] Detection of SN 1006 and HESS J1731-347 with Fermi-LAT: a complete view of shell-type TeV SNRs	LEMOINE-GOUMARD, Marianne
15:00	[60] Fermi Large Area Telescope observations of supernova remnants Kes 73 and Kes 79	YEUNG, Paul Kin-Hang
15:15	[183] Disentangling hadronic from leptonic emission in the composite SNR G326.3-1.8	DEVIN, Justine
15:30	[159] Thermal X-ray studies on escaping of accelerated protons from SNR shocks	Mr SUZUKI, Hiromasa
