

# 7th International Fermi Symposium

## Thursday, October 19, 2017

### Extragalactic diffuse & EBL II - GaPa/1-1 - Olympiasaal (2:00 PM - 4:00 PM)

-Conveners: Seth Digel

time	[id] title	presenter
2:00 PM	[163] Exploring the full information content of the extragalactic gamma-ray sky maps	CUOCO, Alessandro
2:30 PM	[90] Measuring the Galaxy Luminosity Density out to $z \sim 6$ with Fermi-LAT	HELGASON, Kari
2:45 PM	[157] The Density of Blazars above 100 MeV and the Origin of the Extragalactic Gamma-ray Background	MARCOTULLI, lea
3:00 PM	[211] Extragalactic Background Light Measurements from a Combined Likelihood Analysis of Blazars Detected with the MAGIC Telescopes	DOMINGUEZ, Alberto
3:15 PM	[213] Study of the anisotropy of the unresolved gamma-ray background	NEGRO, Michela
3:30 PM	[161] Updated Fermi-LAT Constraints on the Extragalactic Background Light	ARMSTRONG, Thomas
3:45 PM	[94] Deriving the contribution of point sources to the Extragalactic gamma-ray background with efficiency corrections and photon statistics	DI MAURO, MATTIA
