

7th International Fermi Symposium

Thursday, 19 October 2017

Extragalactic diffuse & EBL II - GaPa/1-1 - Olympiasaal (14:00 - 16:00)

-Conveners: Seth Digel

time	[id] title	presenter
14:00	[163] Exploring the full information content of the extragalactic gamma-ray sky maps	CUOCO, Alessandro
14:30	[90] Measuring the Galaxy Luminosity Density out to $z \sim 6$ with Fermi-LAT	HELGASON, Kari
14:45	[157] The Density of Blazars above 100 MeV and the Origin of the Extragalactic Gamma-ray Background	MARCOTULLI, lea
15:00	[211] Extragalactic Background Light Measurements from a Combined Likelihood Analysis of Blazars Detected with the MAGIC Telescopes	DOMINGUEZ, Alberto
15:15	[213] Study of the anisotropy of the unresolved gamma-ray background	NEGRO, Michela
15:30	[161] Updated Fermi-LAT Constraints on the Extragalactic Background Light	ARMSTRONG, Thomas
15:45	[94] Deriving the contribution of point sources to the Extragalactic gamma-ray background with efficiency corrections and photon statistics	DI MAURO, MATTIA
